

Congratulations!
You've found Mr. Mucha-Stash.
Your calcium, magnesium and iron
supplement needs have just been
fulfilled.

Mr. Mucha-Stash is just like other
Cal/Mag supplements you may be used
to... spare two things. We are local and this
product is better.

This product is independently laboratory
tested for its nutrient content. Our analysis
really is guaranteed. Mr. Mucha-Stash
promises not to compromise quality or use
inferior materials.

Mr. Mucha-Stash is made with pride in
Michigan with the local grower in mind,
because that's who we are, and that's who
we care about.

We are a small business in Michigan bent
on providing the modern grower with high
quality, organic, low cost products. When you
read about us, you'll find that we don't need a
bunch of unvalidated "advanced" sci-fi nutrient
hype surrounding our products. It's a sad fact
that many companies in the industry are more
marketing than science. That's not us.

The All Day Organics team has had zero
training in business and marketing. We didn't
figure your plants would care. They don't. We
asked them.

Instead, our team consists of commercial
growers carrying degrees in ecology, soil
science, biochemistry, and engineering. We are
also accused of being total hippies. Rest assured
that all our products are as natural and safe as
we can make them.

With your support, we hope to make this
company a shining success by continuing to
offer horticultural solutions at honest and
competitive prices.

Buy local, eat local, be local.
Thanks from all of us @
All Day Organics

MR. MUCHA-STASH CALCIUM AND MAGNESIUM SUPPLEMENT

At the heart of every green molecule in plants is a
single magnesium atom. This is the secret to their light
capturing power. Do not let your plants go without it.
Calcium and magnesium both play heavy roles in the
assembly of carbohydrates that fuel robust flower
production. Calcium ensures proper nitrogen flow,
nutrient absorption, and is vital for root expansion.

Mr. Mucha-Stash provides a potent but safe dose of these micronutrients and also provides chelated
iron, a critical and under represented element in many feeding schedules. Iron is involved with anything
and everything in enzyme systems, electron transport, and other metabolic functions, including
photosynthesis.

Mr. Mucha-Stash uses a superior form of chelated iron. Watch out for inferior formulas using EDTA, a
toxic and less effective chelate.

Mr. Mucha-Stash is a high quality amendment compatible with any nutrient system.

Guaranteed Analysis	
Total Nitrogen (N)	4%
4% Nitrate Nitrogen	
Calcium (Ca)	3.8%
Magnesium (Mg)	1.2%
1.2% Water Soluble Magnesium (Mg)	
Iron (Fe)	0.1%
0.1% Chelated Iron (Fe)	
Derived from: Calcium Nitrate, Magnesium Nitrate, Iron DTPA	

Usage & Instructions*: *please read entire label before use

Using Mr. Mucha-Stash is easy.
•Soil: Add one tsp (5mL) for every
gallon (4L) of nutrient solution, once per
week.
•Hydrogardens: Add 2 tsp (10mL) for
every gallon (4L) of nutrient solution.
*Mr. Mucha-Stash is safe for every nutrient
delivery method.*

•For Calcium/Magnesium Deficiencies:
For deficiency corrections, use double the
recommended dose for the first week, then
continue with the dosages above.
Do not use Mr. Mucha-Stash on seedlings
or cuttings for at least two weeks, or for one
week after transplanting. Mr. Mucha-Stash is
a safe but potent elixir, do not overnutriate.

Safety:

Keep out of reach of children and
idiots. Do not drink. Always wear gloves
and eye protection when mixing any
chemicals or nutrients.
In case of ingestion, contact American
Association of Poison Control Centers
1-800-222-1222. If product comes into
contact with eyes, flush with water for
15 minutes.
